Their excel-ient record is fully deserving of at east that recognition.

WHY AMERICAN SAILORS?

There is no telling how long it will pefore our government. through the navy department, can explain how it was that American sailers should be landed on the Dalmatien coast but so far as known at the present time there is no explanation at hand. According to the reports received from the other side our saliers were landed for the purpose of preventing the Italians from encroaching upon the rights of the Jugo-Slavs in that region and it has been established by departmental inquiry that there strike. was a landing made, but whether is was at the direction of British naval authorities remains to be determined.

Arrangements were such during the war that certain European nations were in charge of naval operations in errain waters. It is possible that the operating in the Adristic are guided playing deep concern over the fall by a supreme authority the same as y a supreme authority the same as, Foch was selected to so direct the allied operations in the war. Otherwise merican commanders would obey or ge, rich quick. ders from the British admiralty, or latter would think of giving such us # is said were carried out.

ty was responsible for the landing ordere remains to be established. the same time it will be interesting to except that it was because President chances on the eulogy. Wilson took the stand he did on the Frume question or that the same policy was carried out that would be unser the league of nations. At any rate to get rid of a surplus and at the same some explanation should be forth-time do a friendly act.

STRIKING AT COLD STORAGE.

For the purpose of correcting a con-dition which, if all reports are cor-rect, has existed two long already legislation that will serve to overcome the situation has been advanced a peg by the passage in the lower house of congress of the additional cold storlegislation recommended by Presdent Wilson as a means of reducing

but it is perfectly apparent that they gained that they were really dead. can be put to such uses that they will serve as a means for those who tike to eagage in such activities to may depend to a large extent upon corner supplies, advance prices and whose thermometer is used, but there gouge the public right and left. While it is realized that much benefit is on the excellent record that has been

one season so that what would oth erwise go to waste can be had in other seasons, the harm comes in ty ing up through such storage of goods longer periods than it is necessary. the reason being the effect that it will have upon the market price of those

or similar goods. According to this bill feedstuffs cannot be held in storage for more than twelve months, and all goods when released from storage must be plainly marked, showing the date when they stantial penalty in the shape of fine or jall sentence and in view of the misuse to which cold storage has keen put there is every reason to be-lieve that the senate will take early action for the purpose of making the law effective as early as possible. Whatever influence it can have upon high prices is certainly needed.

The idea of planting trees along the in foreign countries and there are many highways in our own country that have been greatly beautified by the long stretches of trees that were the long stretches of trees that were uniformly set out years ago and now provide a large percentage of the attractiveness of those drives. It is also true that many of the country blaces have been sent the country blaces have been sent to the country blaces have been sent to the sen

under consideration the planting of nut and fruit trees by the side of the road on a rather extensive scale. The expense it is intended shall be berne by the state with such help as the farmers will give. This will mean in time not only attractive but well shaded highways, especially if the trees are given proper protection. It is also planned that much benefit will be obtained from the products of such trees.

It is a question, however, whether

It is a question, however, whether fruit and nut trees will prove as satisfactory as the trees that would simply provide shade and add to the attractiveness. The very fact that they were fruit and nut trees would be suf-ficient reason for all kinds of attacks on them to get the fruit and it is questioned in the case of the fruit trees whether the apples, pears or peaches would be allowed to remain on the trees long enough to get ripe Has anyone a question but what there would be plenty of harvesters?

SUGAR PRICES.

There have been those who have been so bothered over the shortage of sugar that they have believed that the Nothing could be expected to make restrictions should be removed, that a stronger appeal to the taxpayers the price ought to be allowed to of the town than the conomical and reach any old figure so long as those businessifie administration of town affairs. That is what is always demanded of those who are entrusted liberation to understand what an inwith such duties but unfortunately it creased hardship this would place upthe several years that with high prices and paying twice or

NEEDED REFORMS

"When I start my school for women," began the girl who likes to talk, but the patient listener interrupted her.

"My stars!" she said. "Can't you stir up eacugh trouble just being natural without making a business of it."

"It isn't that kind of a school," explained the girl who likes to talk. "I'm just going to give lectures pointing out to my sex its footish mistakes. I shall have enough subjects to hist out my iffetime and then some. Just this minute I met a pretty lady out on the street. Unity my exreme inclingence as wonderfully waved and there was just the right touch of powder and rouge—and then after looking herself over complacently what did the benighted creature do but pick up a bright green parasol and saunter out to do execution.

"She was floating down the sidewalk as well satisfied with herself that her emotion radiated from her—and that green silk with the sun shining through

The idea of planting trees along the highways is nothing new. Such a so well satisfied with herself that her plan has been carried out extensively emotion radiated from her—and that some time ago.

uniformly set out years ago and now provide a large percentage of the attractiveness of those drives. It is also true that many of the country places have handsome tree-lined highways leading up to or past the farm houses.

On what appears to be a much more extensive scale than heretofore attempted hereabouts the commissioner of highways in New York state has under consideration the planting of nut and fruit trees by the side of the

we are convinced that no real lady would do so. It makes their eyes look so dark and provocative, shaded that so dark and provocative, shaded that way, that they really appear better looking than they are, and that is deceptive, and it is wrong to deceive. No! Rather let me perch my hat dizzily on top my dome, spear it through a wisp of straight hair, showing all my ears, the thirtsen wrinkles above my eyebrows and be perfectly honest and conceal nothing.

"That's the way those women argue.

"That's the way those women argue I never yet saw a woman whose hat was ten inches higher up than it should be who didn't wear an utterly complacent, prim expression. No hu-man soul eyer would want to confide in her, firt with her-and as for kissing her-well they don't pause to argue it out, but no live man could any more kiss a woman whose bat was way up on top of her head than he could smoke a cigar just rolled up from cabbage leaves. It just isn't

flop and fly. Every counter downtown where these colored bead necklaces are sold is mobbed by fat women. They can't resist 'em. The more broiled and warm and melting a woman is the more items she puts on, and the irritated beholder wants to weep and slap her.

"Once in my life I saw a woman who weighed 266 but was dressed in a plain, well cut skirt, a plain, loosely belted Russian blouse, with a narrow collar of white around the deep oval of the nack, a drooping, simple hat and not leave to the patient listener.—Chicago News.

IN THE DAY'S NEWS How Germany Seized Kiaochow.

"Kinochow. China, seized by Germany in 1897, captured from the Germans by Japan when the latter entered the world war in 1914, and now controlled by Japan under a treaty of 1915 which the Chinese declare nugatory. makes a test case for the adjustment of the relations between the two orien-tal powers' states a bulletin of the National Geographic Society.

"Streets were laid out and given German names. German banks, Ger-man industries, including brewerles, and German notels were established. No other postoffice than the German one was permitted to handle foreign mail

mail "Germany obtained not only in-demnities and the 193 square miles area and bay described, but mining and railway concessions. Shantung bas fertile, well cultivated lands, coal fields deposits of iron, gold and other metals, and small diamonds are found.

A railway was built to Chinanfu, connecting with important inland lines.

"Perhaps these commercial advantages were incidental. Said Theodor Springman in 'Deutschland und der Orient': With the help of Turkey, India and China may be conquered. Having conquered these, Germany should civilize and Germanize the world, and the German integers would been evaporated.

Why Be Fat?

Become Slim This Summer world, and the German language would become a world language.

"Anyway Germany was reluctant to relinquish her holdings. Japan bombarded Tsingtau for more than two months, from land and sea and not until the fortifications were practically demolished did the garrison capitulate, Nov. 7, 1914.

OTHER VIEW POINTS

The truth is that, while the people of this country have always backed up and are still disposed to back up the egitimate aims of labor when sought by lawful means, there is not only no disposition to approve but there is a firm determination on the part of all makes a test case for the adjustment of the relations between the two oriental powers' states a bulletin of the National Geographic Society.

"Following the murder of two German missionaries in 1897. Germany employed her retaliatory siezure of Kiaochow as a means of obtaining an indemnity and a 99-year lease on Tsingtau and the bay of Kiaochow.

She gave the name of Kiaochow to the fair-minded people to appose all movements, whether by organized labor or any other section or body of our people which undertake to violate the fundamental principles of democratic government and to employ illegal and un American recibing for

distribution to understand what an interested hardship this would place upton the creased hardship this would place upton the sund the bay of Kiaochow, on those who sufficiently burdened twith high prices and paying twice or it with high prices and paying twice or in more than twice for sugar than they of the same name, not within the German concession, which is not be confused with the nearby city of the same name, not within the German zone. The concession includes the gar by the direction of the equalization board is selling for eleven cents a pound. It is within memory that it could be hought for five cents a pound, yet that does not justify the idea that all restrictions should be removed and the price allowed to go to 15 or 20 feets as pound. And yet that is where we are told it is headed for unless the sugar equalization board is continued and of world domination. The setting of the sugar equalization board is continued and of world domination. The setting of the sugar equalization board is continued and distribution return. Even the fact that the board has not been given authors in yet contracted the board has not been given and the aby was directed and received and the sugar equalization board is continued and the bay which has a province conspicution and when the province of the fact that the board has not been given authors in the fellow of the state of the sugar equalization board is continued and the sugar equalization board is continued to the following the sugar equalization board is continued to the following the sugar equalization board is continued to the sugar equalization to the feet of th

the best along the Chinese coast, and to base a stronger natural defense than Port Arthur.

"Back of the city rise hills as high as 1999 feet and a range 600 feet high as 1999 feet and a range 600 feet high deminates the harbor. This range was utilized by the Germans for forts where they mounted powerful Krupp guns, commanding every point of land and sea approach. When the Germans completed their defenses Tsingtau was completed their defenses Tsingtau was considered one of the most strongly fortified ports on the globe.

"All this protection was not to be afforded a fishing village and a none too busy harbor. Natives were persuaded to move, and the lessors built a typical German city on the site of Tsingtau. They also renamed this city, calling it Ching-tao, but the older name clung to it.

"Streets were laid out, and given German banks, German city on the site of German banks, German
